Catalogue of Minolta's model MS-R1100 Digital Image Filing System.

"Zenza Bronica Camphoto VX3000", Photographic Industries, June, 1994, Vol. 52, No. 6, pps. 12-15.

The relevance of the three Japanese patent applications is discussed in the background portion of the specification. In addition, to assist the examiner's understanding of these references, English abstracts are being submitted for published application Nos. 5-75902 and 3-271730. The combined signals are recorded on a tape 6 by means of a video tape recorder 5.

The Minolta MS-R1100 described in the catalogue is a digital image recorder which can systematically record and retrieve high-quality images to and from a magnetic tape in large quantities. For the examiner's reference, information related to this product is described in copending application Serial No. 07/949,579. Portions of the article from Photographic Industries have been outlined and labelled with the numbers 1-4. Translations of these portions are being submitted herewith, and are labelled with the corresponding numbers.

To assist the Examiner, the documents are listed on the attached form PTO-1449. It is respectfully requested that an initialled copy of this form be returned to the undersigned.
